HELPFUL HINTS : ZILLION II

Level One :

Always keep shooting! You can get many Norsa warriors before they shoot. Learn how and when to jump. If you jump and move in a diagonal direction, you can jump higher. When you have the three Zillion laser pieces, you will be able to take down many attackers with less shots. The pulsating areas on the floor will decrease your life meter, so watch out!

Level Two :

When on this or any even numbered level you must be careful of Noza Noza. Wait before you jump across a bottomless pit. Get as close to the edge as possible and shoot any Norsa warriors and Noza Noza before jumping across. When fighting the Olivion Platoon Captain, stay where you start and just shoot. Be ready to turn quickly when he appears behind you!

Level Three :

This level is much like level one, except things move faster. Sometimes there will be multi-level floors. Try to get on top of these, sometimes there is less fighting here. When fighting the Norsa Raker (in the Armorator) shoot level with him and shoot a couple of shots. Move up or down right away so he doesn't hit you. When fighting the Norsa Raker (without Armorator) shoot as much as you can. When he fires on you, jump over it. If you complete fighting the Norsa Raker (without the Armorator, or lose it) go as far to the front as you can, duck down in the Turbo Cycle and shoot.

Level Four :

The Black Noza Noza takes two shots to destroy. If you don't have enough room to take two shot, jumps or dodge him. When being attacked by the Jet Soldiers, duck down and they can't hit you. After you have made it to the Radjian Defense Leader, go in to about the center of the screen and stay there. When he is on the ground, duck and shoot. When he jumps, stand and turn toward where he will land. As soon as he lands, duck and repeat the procedure again.

Level Five :

Change to Armorator when you first start this level. Learn to dodge the Gun Batteries. There will be two sets of Norsa Rakers and they will take more shots to destroy. After you destroy the first set of Rakers, there will be two or three Norsa warriors on Aeroboats coming from behind you, so be prepared!

Level Six :

Notice the blocks stacked on the ceiling to form triangles. Norsa warriors will drop out and attack you. To get by the warriors, shoot them as quickly as you can. When the Norsa Mini Rakers come at you, duck and dodge their fire. Fighting Alleevia Suprese is tricky. The best way to attack, is to dodge his missiles and shoot continuously. When he comes very close, jump over him, turn around and keep firing. Repeat the same procedure until you defeat him.

Level Seven :

This is probably the hardest level. Having a complete Zillion Laser will help greatly. You must learn to dodge the various enemies attacking. You can change to Armorator immediately. The pulsating areas on the floors will not hurt you.

Level Eight :

This level is much like level six. Watch out for Gun Batteries. They shoot out mega Skofu Sites. To defeat Baron Rick, jump up and shoot toward the right. Keep firing constantly at him while dodging his laser fire. When he comes at you, shoot him. When he gets hit, he flashes and while he is flashing, you are able to walk through him (quickly) then turn around and keep firing. Repeat the procedure and continue shooting to wear the Baron down. Do not try to hurry as this is not a timed fight!

Additional Hints

To keep from getting hit the the flying Skofu-Site (When you're on the motorcycle), keep pressing down on the directional pad in the lower right hand corner and keep firing forward. This will save you a lot of power.

Don't go down to the Electric Coils in odd levels.

Use your Zillion 3. This is the best weapon.

Fly and shoot down the cannons at the top. This will help.

On level five, try to have both Apple and Champ in reserve.

When in the Robot position, fight the giant Norsa Raker twice. After the second time, there's a door. Exit through the door.

Remember when your life meter is at I or L in the word LIFE, switch partners.

Good luck!!
